Overview of a new concept

Flows – description of elements
1. Pantry 2. Steam oven 3. Microwave oven
4. Refrigerator 5. Oven 6. Dishwasher

Product

Inno-vation

We continue to keep you at the heart of everything we do and have made a conscious effort to design, and manufacture products that serve a larger purpose. Built-in appliances seamlessly integrate into your Kitchen, reducing the nooks and crannies that might accumulate dust and dirt in the corners or the narrow gaps between the appliance and the walls or other furniture. They save space and are incredibly convenient to use and operate. It is our mission to spread innovative design through our cutting edge technology, constant research, and great passion for quality.

The New Standard

Every design for a new product begins with an in-depth study of Indian lifestyle, region-specific habits and the unique environments in which we live and work.

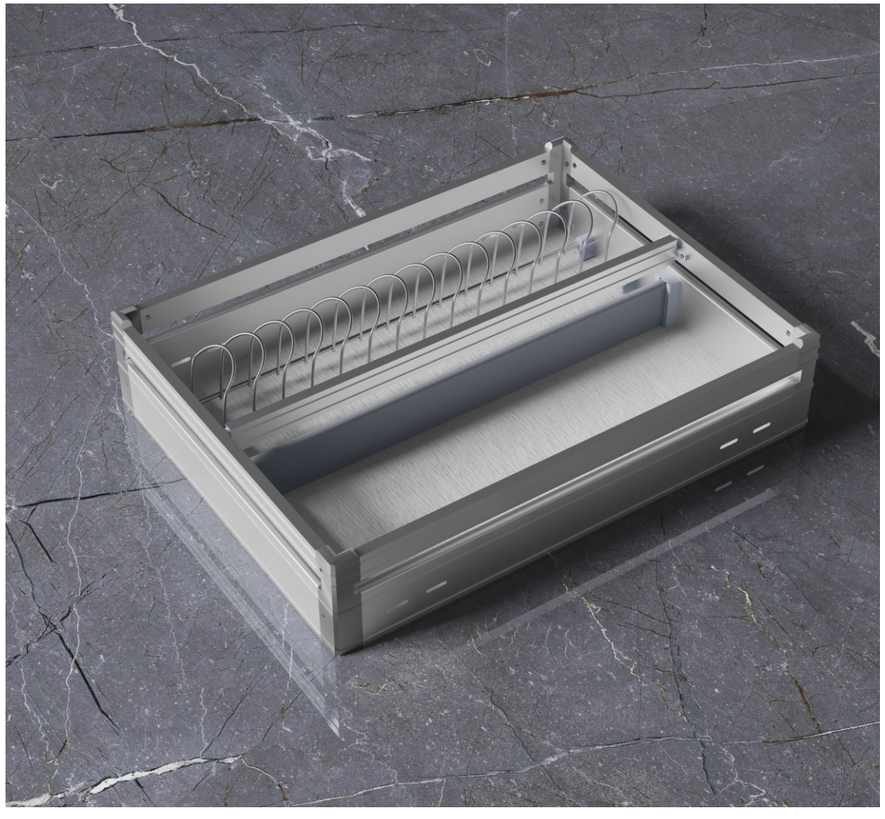

All The Rooms In The Home, The Kitchen Is The Most Complex And Fascinating, The Place Where Cuisine And Conviviality, The Ancestral Elements Of Fire And Water, High-performance Materials And Cutting-edge Technologies All Merge Into One. The Aquare Response To This Complexity Has Always Been To Marry Technical And Practical Precision, The Innovation Of Shape With That Of Space.

An Italian History

Cup

Cup

Available Size:

H - 4 Inch
